## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 13 and 14, drawn to a method of continuous titration.

Group II, claim(s) 6-12, drawn to an analytical device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the analytical device recited in claims 6-12, does not have special technical features common with the invention of Group I, as, e.g. Surjaatmadja (US 5,192,509) discloses an apparatus for automatic titration, comprising: at least two input ports in fluid communication with a common channel, a detection zone having an input in fluid communication with the common channel and the output, a color detector for detecting the color of the fluid (can be easily substituted with spectrophotometer), and control means connected to continuous flow type metering pumps to vary the composition of the fluid continuously and linearly (figure and col. 2, lines 50-60). Therefore, all the features of claim 6 are anticipated or obvious over the prior art, which makes the inventions of Groups I and II lack the special common technical feature, i.e. lack the unity.

A telephone call was made to Richard E. Fichter on 11/15/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1743

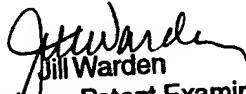

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
